

RANA VIVEK

Python Developer | Backend Developer | FastAPI Specialist

Surat, Gujarat, India | +91 8160466054 | ranavivekashokbhai@gmail.com | linkedin.com/in/rana-vivek

PROFESSIONAL SUMMARY

Motivated B.Voc IT student and aspiring Python / Backend Developer with over a year of internship experience in WordPress and Shopify development at Softrica, working on real client-facing production websites. Proficient in Python, FastAPI, and REST API development through self-driven personal projects. Passionate about building scalable backend systems, learning modern technologies, and growing into a professional backend engineering role.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Frameworks & Libraries: FastAPI, LangChain, Streamlit

AI / ML: RAG (Retrieval-Augmented Generation), Jina AI Embeddings, Vector Storage, Semantic Search

Databases: SQL, RDBMS (relational database concepts)

CMS & E-commerce: WordPress, Shopify

Tools & DevOps: Git, GitHub, Deployment workflows, Debugging

Soft Skills: Problem Solving, Team Collaboration, Quick Learner, Adaptability

PROFESSIONAL EXPERIENCE

Softrica — Web Developer Intern

Feb 2025 – Present | Gujarat, India

- Developed and customized 20+ live production WordPress and Shopify websites for real clients across multiple industries including hospitality, metals, export, e-commerce, and fintech.
- Managed deployment workflows, performed active debugging, and maintained ongoing website stability across 20+ live client projects.
- Collaborated directly with clients and internal teams, gaining experience in real-world project lifecycle and professional communication.
- Notable projects: softrica.com · gurukripahotel.com · jishaenterprise.co · nutbes.com · maicometals.com · ramsonexport.com · NeoStack · Kalakruti Processors · Tyliisa (Shopify) · Phonix FX · and 10+ more

PERSONAL & ACADEMIC PROJECTS

RAG-Based AI Chatbot · Python · FastAPI · LangChain · Streamlit · Jina AI

- Independently built an AI-powered chatbot using Retrieval-Augmented Generation (RAG) architecture from scratch.
- Developed the backend API with FastAPI; integrated Jina AI embeddings for semantic document search and vector storage.
- Designed an interactive frontend using Streamlit; orchestrated the full pipeline — chunking, retrieval, and generation — with LangChain.
- Gained in-depth practical knowledge of RAG workflows, embedding models, and AI pipeline orchestration.

Personal Budget Tracker · Python · File I/O · CLI

- Built a Python command-line tool to log, categorize, and track personal expenses and savings across time.
- Generated financial summaries and actionable insights through structured file-based data handling.
